**DETAILED ACTION**

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-13 and 28-33, drawn to a method for preparing cytotoxic lymphocytes in the presence of fibronectin.

Group II, claims 14-15, drawn to a cytotoxic lymphocyte.

Group III, claims 16-27, drawn to an agent comprising fibronectin or a fragment thereof.

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is further required to elect:

a specific method of preparing a cytotoxic lymphocyte comprising contacting cytotoxic lymphocytes in the presence of fibronectin in a medium, or fibronectin immobilized on a solid phase (if group I is elected),

a specific fibronectin or fibronectin fragment from the group consisting of SEQ ID Nos: 1-19 (if group I or III is elected),

and list all Claims readable thereon including those subsequently added. Currently claims 1-4, 9-13, and 28-33 are generic with respect to a method of preparing a lymphocyte with a fibronectin in a medium or an immobilized fibronectin, and claims 1-8, 12-13, 16, 20, 24, and 28-33 are generic with respect to a fibronectin or fragment thereof.

Art Unit: 1644

5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6. The inventions listed as Groups I-III and the species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reason:

The inventions of Groups I-III have no special technical feature that defined the contribution over the prior art of Rao et al., 2000.

Rao et al. teach a method of preparing CD8 T cells (i.e. a cytotoxic lymphocyte) comprising expanding the cells in the presence of fibronectin (see Fig. 1 in particular).

7. Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have a single general inventive concept and so lack unity of invention.

8. Accordingly, Groups I-III are not so linked as to form a single general inventive concept and restriction is proper.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

Art Unit: 1644

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amy E. Juedes, Ph.D. whose telephone number is 571-272-4471. The examiner can normally be reached on 8am - 5pm, Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on 571-272-0841. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
